MAJOR MUNICIPALITIES

According to Statistics Canada census data, the major municipality in the North Central Region that gained the most population from 2001 to 2006 was Athabasca with an increase of 6.6% or 160 residents. Over the same period, the major municipality that gained the most residents in the region was Westlock with an increase of 189 residents.

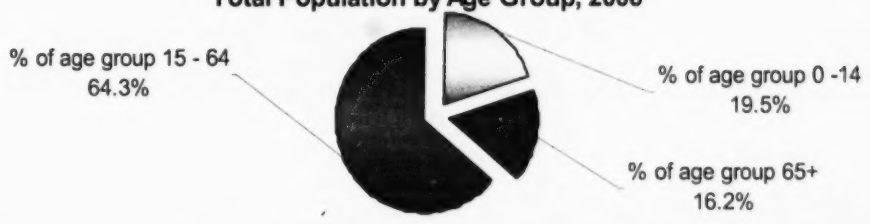
Total Population by Age Group, 2006



IMMIGRATION – PERMANENT RESIDENTS

According to Citizenship and Immigration Canada, in 2007, 20 immigrants selected a location in the North Central Region as their destination of choice on their permanent residence application form.

Please note: This figure does not include temporary foreign workers, students or temporary residents. Also, those that selected a certain province as their destination of choice on their permanent residence application are not required to move to the province indicated. This means that there could potentially be data missing due to immigrants indicating once province as their destination and then actually moving to another.

The annualized percentage growth from 1997 to 2007 for the North Central Region was -6.2%. The annualized percentage growth from 1997 to 2007 for Alberta was 4.8%. The total change for the North Central Region was -25.9% (-7) between 2002 and 2007and 47.4% (-18) between 1997 and 2007.

LABOUR FORCE CHARACTERISTICS

According to Statistics Canada's census data, the North Central Region's employment rate for the working age population of 15 years and older was 66.4% in 2006 and the participation rate was 68.7%.

Please note: Statistics Canada cautions the reader that the regional labour force data may be subject to large year-to-year fluctuations, especially for the smaller regions. Hence Statistics Canada Census 2001 and 2006 data was used for all labour force indicators in the Battle River Region (see note in below table.)

In 2006, the North Central Region's employment rate for the 15 to 24 year old age group was 63.4% and the participation rate was 66.7%. In the same year, the unemployment rate for the working age population of 15 years and older was 3.5% and the unemployment rate for the 15 to 24 year old age group was 5.2%. Alberta had the lowest unemployment rate of all provinces in 2006 at 3.4% - well below the national average of 6.3%

Between 2006 and 2007, the number of people employed in Alberta grew by 4.7% or by 88,700. Between 2002 and 2007, the number of people employed grew by about 289,000 or 17.2% in Alberta.

In 2007, Alberta made up 10.3% of Canada's working age population (15+ years), and the province created just under one-quarter or 23.2% of all new jobs in Canada. Alberta created nearly as many new jobs as Ontario (88,700 vs 101,100), which has more than three times the working age population of Alberta.

Economic Indicators: North Central Region

Employment Rate - Age Group: 15 - 24 (%)	63.4	61.5
Source: Statistics Canada Census, 2001 and 2006.		

Statistics Canada cautions the reader that the regional labour force data may be subject to large year-to-year fluctuations, especially for the smaller regions, for the following reasons. First, there are no population control totals for special geographies such as these regions. Second, some of the smaller regions have small sample size, leading to greater volatility in the estimates. Third, Statistics Canada periodically redesigns its survey methodology; the latest redesign was done in 2005. Because of these data problems, Census data for 2001 and 2006 were used for all indicators for the smaller regions, and data for these indicators for the other years are not included.
**Census estimate*

EMPLOYMENT BY INDUSTRY

In 2006, according to Statistics Canada's census, the services-producing sector in the North Central Region accounted for about 59% of the total number employed.

The Agriculture and Forestry industry continued to have the largest number of individuals employed. This industry is followed by the Retail Trade, Healthcare and Social Assistance, Mining and Oil and Gas, and Education industries.

SMALL BUSINESS ESTABLISHMENTS

In 2007, 97.2% of all business establishments in the North Central Region were classified as small business (businesses that have between 1 and 49 employees). The Construction industry had the largest number of small businesses, followed by Agriculture and Forestry, Retail Trade and Other Services.

From 2006 to 2007, the total number of small business establishments in the North Central Region declined by 2.3% (a net loss of 43 establishments). From 2002 to 2007, the region had a 3.4% decline in the total number of small business establishments with employees (a net loss of 64 establishments).

INVENTORY OF MAJOR PROJECTS

As of December 31, 2008, there were 7 projects in the North Central Region that were proposed, planned, under construction or recently completed.

The total value for these 7 projects for region was $157.5 million. The largest projects are in the institutional and infrastructure sectors.

Please note: 2008 and 2007 can not be compared because some projects are carried over several years and there is only one cost available for the entire project

Source: Alberta Finance and Enterprise, Inventory of Major Alberta Projects

1. This inventory lists projects in Alberta, valued at $5 million or greater, which have recently been completed, are currently under construction, or are proposed to start construction within two years. Not all projects over this threshold are listed due to reasons of confidentiality and/or due to information not being available at time of printing.
2. Project data is obtained from public information sources. Although, where possible, this data has been verified with the project proponent/developer, users of the Inventory may wish to confirm project data with the proponent/developer.
3. The inventory does not breakdown project expenditures by any given year. The cost of the project is the value of expenditures expected over all phases of project construction, which may span over two or more years.
4. The costs of projects listed in the inventory are estimated values only.

Economic Indicator Definitions
1 Dependency Ratio – The percentage of the population below the age of 15 (Child) and over the age of 64 (Elderly) divided by the number of adults (15 – 64). This is the population of children and elderly that are dependent on the adult population for economic needs.
2 Old Age Dependency Ratio – The percentage of the population over the age of 64 (Elderly) divided by the number of adults (15 - 64).This is the population that is dependent on the adult population for economic needs.
3 Permanent Immigrants – Citizenship and Immigration Canada's (CIC) count of where immigrants are landing within the province of Alberta. This includes spouses, dependents, entrepreneurs, investors, self employed, refugees and family sponsorship. This does not take into account those that land in other Canadian provinces and then move to Alberta.
4 Annualized Percentage Growth, 1997 - 2007, 10 Years (%) – The average annual increase in immigrants over the 10 year period.
5 Labour Force Characteristics – Drawn from Statistics Canada's Labour Force Survey (LFS) or from the Census. The LFS is the source of current, monthly, and annual estimates of total employment (including self-employment) and unemployment. Allocating existing LFS respondents to Economic Indicator Regions results in insufficient data for certain regions (i.e. Insufficient sample sizes). **LABOUR FORCE:** Persons who are 15 years or over that were not institutional residents that were either employed or unemployed for the year. Labour Force = Employed + Unemployed. **PARTICIPATION RATE:** Number of persons from the Labour force expressed as a percentage of the population aged 15 years and over. Participation Rate = (Labour Force / Population 15 years and over)*100. **UNEMPLOYMENT RATE:** Number of unemployed persons expressed as a percentage of the labour force. Unemployment Rate = (Unemployed / Labour Force)*100. **EMPLOYMENT RATE:** Number of employed persons expressed as a percentage of the population 15 years of age and over. Employment Rate = (Employed / Population 15 years and over)*100.
6 Employment by Industry – Based on the LFS or Census data. Industry and occupation codes are assigned using the respondent's job description on the questionnaire. Codes assigned are based on the classifications described in the North American Industry Classification System (NAICS 2002).
7 Income (2006) **Individual Income:** Gross income for individuals filing income tax in Alberta in 2006. **Couple Income:** Gross income for people that defined themselves as married or common law when filing the income tax in Alberta in 2006.
8 Per Capita Building Permit Value ($) – Total value of building permits for a region divided by its population.
